Dear Bakkavor Hiring Team,

I am excited to apply for the Engineering Graduate Programme at Bakkavor. As someone who loves innovation and getting things done, with a background in computing, creative technologies, and project management, I know I can help your team succeed in this industry.

Bakkavor's world-leading position in making new, fresh foods for big UK shops really speaks to me. I would love the chance to work on exciting projects with different teams in a fast-moving, growing company like yours.

Bakkavor's position as a global leader in the fresh prepared food industry, creating innovative products for major UK retailers, deeply resonates with me. I am drawn to the opportunity to work on exciting projects, collaborating with diverse teams in a fast-paced and growth-oriented environment.

As a Computer Science student at the University of East Anglia, I have honed my project management, teamwork, and problem-solving skills through various experiences. Leading software solution designs for communities in Cambodia and Scotland has strengthened my ability to communicate complex ideas, track project progress, and deliver it on time within the deadline.

Moreover, my role as a coxswain for the UEA Rowing Club has significantly boosted my leadership and adaptability. As a coxswain, I am responsible for steering the boat, coordinating the power and rhythm of the rowers, and making tactical decisions. This experience has prepared me to work in fast-paced environments and effectively lead teams towards a common goal.

On top of that I have recently completed the Google Project Management Specialization in just one month, demonstrating my drive and ability to quickly acquire new skills. This experience, coupled with my hands-on problem-solving experience as a manager for a volunteer psychosocial support organization, has equipped me with the planning, organizational, and decision-making skills necessary to take issues head-on as they arise.

I would love to work with Bakkavor's top engineers, where new ideas, being flexible, and always doing your best are important. I think my technical skills, love for the food industry, and great communication and organization make me a perfect fit for the Engineering Graduate Programme. I know I can help Bakkavor keep being successful.

Thank you for looking at my application. I'm so excited to bring my enthusiasm, hard work, and project management skills to Bakkavor. I hope we can talk soon about how I can help your team keep making great new food products while sticking to all the food safety and health & safety rules.

Sincerely, Yeva Yesypenko
